THE UNIVERSITY OF ARIZONA
COLLEGE OF MEDICINE
GUIDELINES FOR PROMOTION AND TENURE

Approved by the General Faculty on June 11, 2010
Amended by Faculty Action, October 12, 2012
I. TRADITIONAL TITLE SERIES

This title series encompasses the traditional unmodified titles (Instructor, Assistant Professor, Associate Professor, or Professor). There are four pathways or tracks to promotion: tenure track, research scholar track (non-tenured), clinical scholar track (non-tenured), and educator scholar track (non-tenured).

A. CRITERIA FOR APPOINTMENT AND PROMOTION: TENURE-ELIGIBLE FACULTY

All faculty members of the College of Medicine engage in teaching, scholarship, and service to varying degrees. The distinguishing feature of the tenure track is the requirement for scholarship. Scholarship is a multifaceted concept, and includes the scholarship of discovery, clinical scholarship and educational scholarship. At the College of Medicine, appointment on the tenure track is open to faculty members who are full-time employees of the University of Arizona (i.e. >.50 FTE). For appointment on the tenure track, adequate time and an appropriate setting must be available for the candidate to achieve success in scholarly activities. Given the demands of scholarly activities, candidates are strongly encouraged to seek mentors who can provide guidance on the requirements of scholarship and on how best to achieve success in this track. The tenure clock is active with appointment at any rank on the tenure track.

1. Appointment as Instructor on the Tenure Track

   Appointment at the level of Instructor on the Tenure Track is based on promise as a scholar, and requires satisfactory completion of the requirements for the appropriate terminal degree (typically a M.D., Ph.D., D.O., or equivalent). Advanced clinical specialty training as a resident or postdoctoral fellow may be required. The appointment as Instructor is to be used rarely and is intended to allow for a period of concentrated effort in the development of teaching, scholarly, or clinical skills as applicable.

2. Appointment/Promotion to Assistant Professor on the Tenure Track

   Appointment at, or promotion to, the level of Assistant Professor on the Tenure Track is based chiefly on promise as a scholar and educator. To be appointed or promoted to this level, an individual is required to have an appropriate terminal degree (e.g. M.D., Ph.D., D.O. or equivalent) and typically have two or more years of postdoctoral experience. For clinical faculty, post-doctoral experience should consist, at a minimum, of specialty residency training. For basic science faculty, this experience would generally be research. The quality of the training and the candidate's record should be weighed in the evaluation of the candidate’s potential. The individual should show potential for excellence in teaching and scholarly activities and a dedication to service (see Appendices for examples). At this career stage the significance and originality of the creative efforts will be more important than their quantity.

3. Appointment/Promotion to Associate Professor on the Tenure Track

   Appointment at, or promotion to, the level of Associate Professor on the Tenure Track is based primarily on accomplishment significantly beyond that required of
an Assistant Professor. In addition to meeting the qualifications for Assistant Professor, a record of sustained scholarly activities since appointment or promotion to the previous rank must be documented. Candidates must be accomplished academicians with a mastery of the fundamentals of their own field and must also have the ability to relate that knowledge to others. Teaching and mentoring should be of the highest quality and clearly documented. For clinical faculty, board certification is required. For faculty whose primary role is research, whether basic or clinical, a reputation for excellence in research among peers at this and other institutions is required. Faculty whose main function has been education, including clinical instruction, must also demonstrate excellence in scholarship. For all faculty, significant service to the Department, the College, the University, the community or one’s profession should be clearly documented. Excellent performance in scholarship, teaching, and service activities (see Appendices for examples) is expected for appointment or promotion to this rank.

4. **Appointment/Promotion to Professor on the Tenure Track**

Appointment at, or promotion to, the level of Professor on the Tenure Track should signify that the individual is an established figure in her or his specialty area. In addition to meeting the qualifications for Associate Professor, an outstanding and sustained record of scholarly activities since appointment or promotion to the previous rank is required. Examples of such outstanding scholarship in various categories of activity can be found in the appendices. For those faculty whose primary area is research, a national and international reputation as an established investigator is required. Faculty whose primary function is education, including clinical instruction, must also be outstanding in at least one area of scholarship. Clinical or laboratory research programs should not only be productive, but also provide training for graduate students, postdoctoral fellows, medical students, and/or other faculty. Teaching should be of the highest quality and clearly documented. There should be active participation in service and outreach, both intramural and extramural, thus further serving the College, the University, the community, and one’s profession. Excellent performance in both teaching and service activities (see Appendices for examples) is expected.

5. **Award of Tenure Separate from Promotion**

The award of tenure with initial appointment is typically reserved for the academic appointments of high-level faculty members of the University of Arizona College of Medicine (Department Head or higher). With sufficient justification provided by the Department, tenure may also be granted to other exceptional faculty candidates upon initial appointment at the rank of professor or associate professor. A faculty member whose initial appointment is at the rank of associate professor or professor, tenure eligible, may be considered for the award of tenure independent of other faculty action. To be awarded tenure, the candidate should provide critical contributions to the Department’s teaching, scholarship and service missions. The candidate should excel in high caliber scholarly pursuits consistent with his or her academic rank and the percent effort described in the candidate’s workload assignment, and should epitomize the type of faculty member who will be instrumental in furthering long-term departmental and college goals.
B. CRITERIA FOR EVALUATION OF TENURE-TRACK TEACHING, SCHOLARLY ACTIVITY, AND SERVICE IN THE COLLEGE OF MEDICINE

The University is a seat of knowledge, and its faculty should assign highest priority to the pursuit and dissemination of knowledge. The activities of College of Medicine faculty members can be divided into three partially overlapping categories: teaching, scholarly activities, and service. No matter how a faculty member's time is divided, the overall effort must produce tangible evidence of intellectual growth and scholarship.

Much of the strength of a faculty lies in its diversity. Individual faculty members vary widely in the distribution of their effort among the above activities. At the time of a proposed promotion, it is the function of the faculty member's departmental Promotion and Tenure committee to advise the College Promotion and Tenure Committee of the accomplishments of the candidate relative to the Department's expectations in the areas of teaching, scholarly activities and service.

As an academician, a College of Medicine faculty member is expected to engage in scholarly and creative efforts. Creativity can be expressed in one's teaching, scholarly activities, or service contributions. The results of such endeavors should be communicated in an appropriate manner, such that they can be utilized and evaluated by the broader biomedical community.

1. GUIDELINES FOR EVALUATING TENURE-TRACK FACULTY TEACHING

Preamble

Members of the faculty must not only impart the knowledge and information needed for competent medical practice and/or research, but must also serve as models to others in a wide range of professional settings.

These elements of medical teaching place unusual demands on some faculty members in terms of their time and energy. Therefore, substantial weight in the evaluation process must be given to teaching effectiveness. Creative activity in the design, development, and implementation of portions of the medical student, graduate student and postgraduate curricula should be recognized as a highly desirable faculty activity.

One of the primary goals of the College is the education of a diverse student population. Appendix A provides examples of typical teaching activities. Although the teaching load varies considerably from person to person, it is expected that all faculty will be active and effective teachers.

Evaluation of Teaching Contributions

Criteria used to judge teaching contributions can include, but are not limited to, the quantity of teaching effort, quality of effort, development of innovative teaching materials, extramural recognition, and publications. The quantity of teaching effort should be judged by both the number of students and the number of hours taught. The quality of effort may be judged by the systematic evaluation by students, course directors and colleagues, student performance on examinations, and professional accomplishments of one's trainees. Extramural recognition at local, national, or international levels may be assessed by invited lectures, guest professorships, attraction of quality students,
postdoctoral fellows, residents and other trainees, and extramural teaching invitations. The ability to attract recognized authorities as visiting faculty, guest lecturers, or sabbatical faculty should also be used to judge teaching contributions.

2. GUIDELINES FOR EVALUATING TENURE-TRACK FACULTY SCHOLARLY ACTIVITIES

Preamble

As an integral component of the University, College of Medicine faculty should assign high priority to the pursuit and dissemination of new knowledge. In evaluating a faculty member's contribution to scholarly activities, the Promotion and Tenure Committee must carefully consider the faculty member's commitments in teaching/clinical activities and traditional service. The extent of classical scholarly activity (publications and grants) expected of a faculty member who spends the majority of her/his time in basic or clinical research is greater than that expected from a faculty member with extensive teaching and clinical obligations. Whatever their role, all must show tangible evidence of scholarly activity, as evidenced by publication/dissemination of the results of scholarly work, thereby providing the basis for further advancement of the field.

The essential attributes of scholarly activities include intrinsic creativity and may be demonstrated in various forms. Excellence must be demonstrated in one or more of the following broadly defined categories of scholarship:

a) The Scholarship of Discovery. Represents the interplay between development of hypotheses and discovery of new knowledge in basic, clinical, and translational research (Appendix B);

b) Educational Scholarship: Represents the synthesis of facts and theories in creative formats that facilitate their understanding and use by others, and the development of creative methodologies that foster such understanding (Appendix C)

c) Clinical Scholarship: Represents the creative use of existing facts and theories in the development of new clinical applications such as treatment modalities, shaping public policy, and advancing healthcare delivery (Appendix D).

These categories and specific examples of activities in each category are described in more detail in Appendices B-D.

Evaluation of Research/Scholarly Activity

The dossier must include the following information.

- A clearly stated workload assignment that includes the percentage effort in each relevant category as developed in consultation with the Department Head.

- A detailed curriculum vitae prepared in accordance with University of Arizona and College of Medicine guidelines.

- Intramural and extramural letters of recommendation. These letters must address issues such as productivity, national or international recognition, reputation, the degree of independence, the novelty/originality and significance of the research/scholarly activities, and the quantity and quality of teaching and service activities. Both intramural and extramural referees must be provided with guidelines that clearly state the evaluation criteria for each candidate.
3. GUIDELINES FOR EVALUATING TENURE-TRACK FACULTY SERVICE

Evaluation of professional service should include consideration of the importance of the service in meeting college or departmental goals, qualities of innovation or leadership in performing such activities, the degree of responsibility involved, duration and time required by the activity, the range and number of such activities, and the contribution to professional growth. Service activities are described in more detail in the appendices (Appendix E for Academic and Administrative Service and Appendix F for Clinical Service). They should be documented in the curriculum vitae, and possibly by internal and external letters.
C. CRITERIA FOR APPOINTMENT AND PROMOTION: NON- TENURE ELIGIBLE RESEARCH SCHOLAR TRACK

This faculty track has been developed to recognize those faculty members, whose primary contribution is to the research mission of the College of Medicine. Research Scholar Track faculty must have demonstrated potential for or achieved independence and excellence in the initiation, direction and completion of research projects. In addition, Research Scholar Track faculty may have administrative and/or teaching roles, and are expected to demonstrate mentorship in the context of research. Faculty on this track are typically employed at the University of Arizona. Faculty members who are not UA employees can qualify for this track at the discretion of their Department Head and departmental appointment, promotion and tenure committee if they meet all criteria for appointment and make a substantial and essential contribution which is critical to the mission of the College. A change in employment status or effort in service to the College requires review of title.

1. Appointment as Instructor on the Research Scholar Track

Appointment at the level of Instructor on the Research Scholar Track is based on promise in research. To be appointed at this level, an individual typically must hold a doctoral degree or its equivalent in professional and/or technical experience, have completed a period of postdoctoral fellowship training or other relevant experience, and have demonstrated potential for excellence as an investigator. A record of publications is expected.

2. Appointment/Promotion to Assistant Professor on the Research Scholar Track

Appointment at, or promotion to, the level of Assistant Professor on the Research Scholar Track requires the demonstration of promise for independence in research. In addition to meeting the qualifications for Instructor, this would typically include a record of publication in peer-reviewed journals, the potential for or receipt of competitive fellowships or grants, and regular participation in professional meetings. Mentoring by the candidate of junior research colleagues and/or students in the context of research programs is expected.

3. Appointment/Promotion to Associate Professor on the Research Scholar Track

Appointment at, or promotion to, the level of Associate Professor on the Research Scholar Track requires independent and productive research with clear evidence of extramural funding, typically as a principal investigator, or with unique and sustained contributions to collaborative research efforts. In addition to meeting the qualifications for Assistant Professor, there should be a strong and continuing record of publication in peer-reviewed journals. An Associate Professor on the Research Scholar Track should have achieved a national research reputation with a record of invited national lectures, seminars, and journal and/or grant reviews. Candidates for this rank must demonstrate a substantial record of high quality mentoring of postdoctoral fellows, junior research colleagues and/or students and demonstrate excellence in College of Medicine educational or service activities.
4. **Appointment/Promotion to Professor on the Research Scholar Track**

Appointment at, or promotion to, Professor on the Research Scholar Track requires a nationally and internationally recognized record of excellence and accomplishment in research, in addition to meeting the qualifications for Associate Professor. The candidate must have a substantial record of first and/or senior authored publications in peer-reviewed journals, typically appeared as principal investigator on major grants (e.g. federal, state, industry or foundation funding) or demonstrate unique and significant contributions to collaborative research efforts, and have received invitations to present lectures and seminars to national and international audiences. A record of excellent research mentoring must be demonstrated. The individual should, furthermore, show evidence of significant contributions to the strength and research reputation, and to the educational mission or leadership of the College of Medicine and the University.
D. CRITERIA FOR APPOINTMENT AND PROMOTION: NON-TENURE-ELIGIBLE CLINICAL SCHOLAR TRACK

This faculty track has been developed to recognize those faculty members who actively contribute to the clinical mission of the College of Medicine and/or are active in clinical teaching, provide significant service, and participate in scholarly activities. The definition of scholarly activity is broader for this track than for the tenure track. Faculty members on this track are typically employed at the University of Arizona or by affiliated institutions. Faculty members who are not UA employees can qualify for this track at the discretion of their Department Head and departmental appointment, promotion and tenure committee if they meet all criteria for appointment and make a substantial and essential contribution which is critical to the mission of the College. A change in university employment status or effort in service to the College requires review of title, and will result in change to the clinical track, unless the requirement for effort devoted to the College of Medicine continues to be met.

1. **Appointment as Instructor on the Clinical Scholar Track**

   Appointment at the rank of Instructor on the Clinical Scholar Track is based on promise as a clinician and educator. Satisfactory completion of a doctoral degree is typically required. In addition, completion of at least one year of residency training, or its equivalent, in the relevant clinical field is required. This individual will be expected to have regular and direct contact with UA College of Medicine medical students, residents and/or fellows.

2. **Appointment/Promotion to Assistant Professor on the Clinical Scholar Track**

   Appointment at, or promotion to, the level of Assistant Professor on the Clinical Scholar Track requires completion of specialty residency training and demonstration of promise as both a clinician and educator, in addition to the requirements for appointment as Instructor. The faculty member should possess excellent clinical skills, a documented record of teaching contributions, and show promise of scholarship. Examples of teaching include ward or clinic attending, preceptorship in clinical venues, participation in small group learning, and lectures, such as specialty conferences or grand rounds.

3. **Appointment/Promotion to Associate Professor on the Clinical Scholar Track**

   In addition to the requirements for appointment as Assistant Professor, appointment at, or promotion to, the level of Associate Professor on the Clinical Scholar Track requires certification in the area of specialty and evidence of an established and productive career. Such an individual should be known at the regional or national level for his or her expertise, as documented by extramural letters. In addition, individuals at this level should have clear documentation of service, teaching contributions, and scholarship at a more advanced level than that required for Assistant Professor. Faculty titles from previous institutions will be taken into consideration when appointment is made to this rank.

   Examples of scholarly activity include development of new courses or curricula; participation in external program reviews or on national grant review committees; participation in the creation of health policy or treatment guidelines; development
of new techniques, therapies, or health care delivery systems; active participation in evaluation of effectiveness (quality, utilization, access, cost) of care provided; participation in research projects; development of health promotion programs; recognition for clinical excellence, including dissemination of clinical advancements; publication in peer-reviewed journals; or invited clinical reviews.

In addition to those cited for appointment/promotion as Assistant Professor, examples of teaching include presentations at local or regional educational or professional meetings.

Examples of service include participation in professional organizations or on COM committees, leadership of departmental committees, manuscript review for journals, consulting for government agencies, advising medical students or mentoring more junior faculty.

4. **Appointment/Promotion to Professor on the Clinical Scholar Track**

In addition to the requirements for appointment/promotion to Associate Professor, appointment at, or promotion to, the level of Professor on the Clinical Scholar Track should signify that the individual is an established figure in his or her field and recognized nationally as documented by extramural letters. Teaching contributions should be of the highest quality and clearly documented. The faculty member should, furthermore, show evidence of significant contributions to the strength, clinical reputation, educational mission, or leadership of the Department, Division or site of clinical practice. Such evidence might include leadership in departmental or College of Medicine committees, appointment to a position of significant responsibility within the Department or COM, service on editorial boards of scholarly journals, membership in important local and national committees, or invitations to speak or chair/moderate sessions at national meetings. In addition, the faculty member must demonstrate scholarly activities within the profession or within the College of Medicine sufficient to have earned him or her national or international recognition. Examples of scholarly activity in addition to those cited for the rank of Associate Professor include creation of innovative approaches in teaching, practice, or research. Examples of service include leadership in national professional organizations such as chairing committees or serving as an officer. Faculty titles from previous institutions will be taken into consideration when appointment is made to this rank.
E. CRITERIA FOR APPOINTMENT AND PROMOTION: NON-TENURE-ELIGIBLE EDUCATOR SCHOLAR TRACK

This faculty track has been developed to recognize those faculty members whose primary duties involve the educational missions of the College of Medicine. While promotion in this track requires scholarship, definitions of that scholarship are broad, including such activities as program development, participation in national organizations, educational research, and development of educational tools. Faculty on this track are typically employed at the University of Arizona. Faculty members who are not UA employees can qualify for this track at the discretion of their Department Head and departmental appointment, promotion and tenure committee if they meet all criteria for appointment and make a substantial and essential contribution which is critical to the mission of the College. A change in employment status or effort in service to the College requires review of title.

1. **Appointment as Instructor on the Educator Scholar Track**

   Appointment at the level of Instructor on the Educator Scholar Track is based on promise as an educator and on a commitment made by an individual to devote time and talent to scholarly activities. Satisfactory completion of a doctoral degree (or other relevant terminal degree) is typically required. This individual is expected to have regular and direct contact with UA undergraduate, graduate and/or medical students.

2. **Appointment/Promotion to Assistant Professor on the Educator Scholar Track**

   In addition to the requirements for appointment as Instructor, appointment at, or promotion to, the level of Assistant Professor on the Educator Scholar Track is based chiefly on promise as an educator. Appointment at this rank typically requires two or more years of postdoctoral or other relevant experience. The individual should possess documented excellent teaching skills comparable to those of tenure-track faculty (Appendix A) and show promise of scholarship. An Assistant Professor is also expected to be involved in service activities.

3. **Appointment/Promotion to Associate Professor on the Educator Scholar Track**

   In addition to the requirements for appointment as Assistant Professor, appointment at, or promotion to, the level of Associate Professor on the Educator Scholar Track typically requires evidence of an established and productive career. These individuals should be known at the regional or national level for their educational accomplishments, as documented by extramural letters. In addition, individuals at this level should have clear documentation of service and scholarship at a more advanced level than that required for Assistant Professor. Examples of scholarship include participation in the development of courses or instructional materials, participation in faculty development activities, and participation in regional or national meetings of professional education societies. Faculty titles from previous institutions may be taken into consideration when appointment is made to this rank.
4. **Appointment/Promotion to Professor on the Educator Scholar Track**

In addition to the requirements for appointment as Associate Professor, appointment at, or promotion to, the level of Professor on the Educator Scholar Track should signify that the individual is an established figure in his or her field, and recognized nationally for his or her educational accomplishments as documented by extramural letters. Teaching contributions should be of the highest quality and clearly documented. The individual should, furthermore, show evidence of significant contributions to the strength, reputation, educational mission, or leadership of the Department. In addition, these individuals must demonstrate scholarly activities within their field or within the College of Medicine sufficient to have earned national or international recognition. Examples of scholarship include teaching awards, development of courses and instructional materials, presentation of faculty development programs, and participation in research on the efficacy of teaching methods, materials, courses, and curricula.
II. CLINICAL, RESEARCHER AND LECTURER TITLE SERIES

A. CRITERIA FOR APPOINTMENT AND PROMOTION: NON-TENURE-ElIGIBLE CLINICAL TRACK

This faculty track has been developed to recognize the many physicians and clinical educators employed by the University of Arizona or in private practice, such as hospitalists and clinicians, who contribute to the training of University of Arizona medical students, residents, and/or fellows. While clinical teaching is the major skill being nurtured and promoted within this academic series, other related accomplishments, such as program development, committee service, clinical research, scholarly work, advising, and/or development of educational tools contribute to meeting the requirements for promotion.

1. Appointment/Promotion to Clinical Instructor

Appointment at, or promotion to, the level of Clinical Instructor is based on promise as a clinician and educator. Satisfactory completion of a doctoral degree is typically required. In addition, completion of at least one year of residency, or its equivalent, in the relevant clinical field is required. The faculty member is expected to have regular and direct contact with UA College of Medicine medical students, residents, and/or fellows for a minimum of 25 hours/year. Examples of regular and direct contact include ward or clinic attending, preceptorship in clinical venues, or didactic teaching.

2. Appointment/Promotion to Clinical Assistant Professor

In addition to the requirements for appointment as Clinical Instructor, appointment at, or promotion to, the level of Clinical Assistant Professor requires completion of specialty residency training and demonstration of promise as both a clinician and teacher. This individual is expected to have a minimum of 50 hours/year of direct teaching contact with UA College of Medicine medical students, residents, and/or fellows. Examples of teaching include ward or clinic attending, preceptorship in clinical venues and giving lectures (such as grand rounds). In addition, the faculty member should demonstrate activity in scholarly endeavors and/or service activities within the profession or in the College of Medicine. Examples of scholarly activities include publications, educational program development, or presentations at educational meetings. Examples of service activity include participation in professional organizations, membership on College of Medicine committees, or advising medical students. Faculty titles from previous institutions will be taken into consideration when appointment is made to this rank.

3. Appointment/Promotion to Clinical Associate Professor

In addition to the requirements for appointment as Clinical Assistant Professor, appointment at, or promotion to, the level of Clinical Associate Professor requires board certification and a local reputation of clinical excellence. The individual is expected to have a minimum of 50 hours/year of direct teaching contact with UA College of Medicine medical students, residents, and or fellows. Examples of
teaching contact include ward or clinic attending, preceptorship in clinical venues and didactic teaching. In addition, this individual must demonstrate accomplishment within the profession or within the College of Medicine in the areas of scholarly activity and/or service. Examples of scholarly activity include publications, educational program development, and educational presentations to state or national organizations. Examples of service include participation in professional organizations, membership on College of Medicine committees, or advising medical students. Length of educational contribution (e.g., previous academic appointment at other institutions, participation in research institutes), quality of teaching (e.g., student and/or peer evaluation, presentation at Continuing Medical Education or formal grand rounds programs) and service activity (e.g., committee participation or leadership, professional organization leadership) will be utilized in assessing the individual for appointment at or promotion to this level.

4. **Appointment/Promotion to Clinical Professor**

In addition to the requirements for appointment as Clinical Associate Professor, appointment at, or promotion to, the level of Clinical Professor requires scholarly and service activities within the profession or within the College of Medicine. Examples of scholarly activity include publications, educational program development, or educational talks at regional, national or international meetings. Examples of service include leadership in professional organizations, College of Medicine committees, or advising medical students. Length of educational contribution (e.g., previous academic appointment at other institutions, participation in research institutes), quality of teaching (e.g., student and/or peer evaluation, presentation at Continuing Medical Education or formal grand rounds programs) and service activity (e.g., committee participation or leadership, professional organization leadership) will be utilized in assessing the individual for appointment at or promotion to this level.
B. CRITERIA FOR APPOINTMENT AND PROMOTION: NON-TENURE ELIGIBLE RESEARCH TRACK

This faculty track has been developed to recognize those faculty members, employed by independent research institutes or other scientific institutions, whose primary contribution is to the research mission of the College of Medicine through collaborative research with other College of Medicine faculty members. Education and service, as it relates to the research mission, may also be expected. Research Track faculty actively contribute to the research mission of the College, and are expected to demonstrate mentorship in the context of research. Research Track faculty must have achieved or demonstrated potential for excellence in the initiation, direction and conduct of clinical, translational or biomedical research projects. This series is also open to faculty members who are employees of the University of Arizona.

1. **Appointment as Research Instructor**

   Appointment at the level of Research Instructor is based on promise in research. To be appointed at this level, an individual typically must hold a doctoral degree or its equivalent in professional and/or technical experience, have completed a period of postdoctoral fellowship or other relevant experience, and have demonstrated potential for excellence as an investigator. A record of publications is expected.

2. **Appointment/Promotion to Research Assistant Professor**

   Appointment at, or promotion to, the level of Research Assistant Professor requires the demonstration of promise for independence in research. In addition to meeting the qualifications for Research Instructor, this would typically include a continuing record of publication in peer-reviewed journals, the potential for or receipt of competitive fellowships or grants, and regular participation in professional meetings. Mentoring by the candidate of junior colleagues and/or students in the context of research is expected.

3. **Appointment/Promotion to Research Associate Professor**

   Appointment at, or promotion to, the level of Research Associate Professor requires excellence in scholarship and productive research, or with unique and sustained contributions to collaborative research efforts. There should be a strong record of publication in peer-reviewed publications, and evidence that this level of accomplishment will continue. A Research Associate Professor should have achieved a national reputation, in addition to meeting the qualifications for Research Assistant Professor. Candidates at this rank must demonstrate a substantial record of high quality mentoring of students, postdoctoral fellows, and/or junior research colleagues.

4. **Appointment/Promotion to Research Professor**

   Appointment or promotion to Research Professor requires a nationally and internationally recognized record of excellence and accomplishment in research scholarship, in addition to meeting the qualifications for Research Associate Professor. The candidate must have a substantial record of first and/or senior
author publications in peer-reviewed journals, have typically appeared as principal investigator on major grants (e.g. federal, state, industry or foundation) at other institutions or demonstrate unique and significant contributions to collaborative research efforts, have been invited to present lectures and seminars, to national and international audiences and be active in editorial and peer-review activities. A record of excellent research mentoring, supervising and research-related teaching must be demonstrated. The individual should, furthermore, show evidence of significant contributions to the research reputation of the College.
C. CRITERIA FOR APPOINTMENT AND PROMOTION: NON-TENURE ELIGIBLE LECTURER TRACK

This faculty track has been developed to recognize those faculty members employed by the University whose duties involve primarily the undergraduate (BS degree) and graduate (MS and PhD) educational missions of the College of Medicine. While promotion in this track requires scholarship, definitions of that scholarship are broad, including such activities as program development, participation in national organizations, educational research, and development of educational tools. Appointments may be on a full-time or part-time basis.

1. Appointment as Lecturer

Appointment at the level of Lecturer is based on promise as an educator and on a commitment made by an individual to devote time and talent to scholarly activities. Satisfactory completion of a doctoral degree in the relevant field is typically required. This individual is expected to have regular and direct contact with UA undergraduate and graduate students and potentially College of Medicine medical students.

2. Appointment/Promotion to Senior Lecturer

In addition to the requirements for appointment as Lecturer, appointment at, or promotion to, the level of Senior Lecturer is based chiefly on quality and extent of teaching experience and contributions beyond the classroom.* Appointment at this rank will typically require five or more years of teaching experience. The individual should possess documented excellent teaching skills comparable to those of tenure-track faculty (favorable to outstanding evaluations by students, peers and junior faculty mentored by the candidate) and show evidence and continuing promise of scholarship. Appointments are typically for more than one year, not to exceed three years. Appointment at this rank may be renewed indefinitely, for up to three years each time, except that all reappointments for longer than one year require approval of the Provost.

* Criteria of evaluation:
- Candidate should excel in teaching as evidenced by UA Teacher/Course evaluations, peer evaluations, awards, and/or letters.
- Candidate should have substantial experience in and knowledge of teaching programs in which he/she participates; typically five or more years is required.
- Candidate will contribute to and participate in the mission of the department beyond classroom teaching. Such contributions could include, but are not limited to, the following: Development of new courses; exploration of innovative teaching techniques; advising independent study and honors theses; mentoring students regarding careers, science and academic life; participating in research; publishing and presenting in science and/or education venues; participating in departmental, university or national committees; sponsoring academic clubs, activities or workshops; acquiring funds for science, educational or outreach activities.
Appendix A
These items are examples and not intended to be all-inclusive.

Teaching Activities

Teaching activities include:

Lecturing, facilitating small groups, instructing in laboratories, and other forms of participation in formal courses for medical and graduate students.

Directing formal courses for medical and graduate students.

Supervision of graduate student and postdoctoral research programs.

Teaching and supervising sabbatical faculty.

Mentoring of junior faculty and peers.

Clinical teaching of medical students and residents or fellows.

Participation in continuing medical education programs.

Development of teaching materials, in print or electronic media.

Development of courses and curricula.

Education for the public at large.

Education of undergraduate students.

Excellent

• Favorable evaluations by students or residents, as part of a systematic evaluation program.

• Favorable evaluations by peers, as part of a systematic evaluation program.

• Favorable evaluations of courses and curricula, as part of a systematic evaluation program.

• Favorable performance data for students or residents, where these can be attributed largely to the

Outstanding

• Outstanding evaluations by students or residents, as part of a systematic evaluation program.

• Outstanding evaluations by peers, as part of a systematic evaluation program.

• Outstanding evaluations of courses and curricula, as part of a systematic evaluation program.

• Outstanding performance data for students or residents, where these can be attributed largely to the
individual faculty member.

- Educational presentations or workshops at meetings of national/international professional societies.

- Favorable evaluation by faculty mentored by the candidate.

individual faculty member.

- Leadership role in educational activities of national/international professional societies.

- Teaching awards from students or peers.

- Publication of teaching materials in peer-reviewed repositories.

- National/international use of teaching materials.

- Visiting professorships.
Appendix B
These items are examples and not intended to be all-inclusive.

Scholarship of Discovery

The scholarship of discovery represents the interplay between development of hypotheses and discovery of new facts (e.g., basic, clinical, and translational research).

**Excellent**

- Publication of articles in professional journals appropriate to the field of endeavor. Greater significance will be attributed to first and/or senior authored papers in peer reviewed journals, but all publications will be evaluated.

- Publication of books, monographs, or manuals on paper or in electronic media that are widely disseminated, evaluated by peers, and advance the field of endeavor.

- Award of extramural support commensurate with the area of interest.

- Demonstration of a sustained leadership role in an independent research program (e.g., research program leader or laboratory/clinic director).

- Evidence for a principal role in management and/or support of a collaborative research program (e.g., letters from program leader or members of the research program).

- Invited presentations of original scientific data at major national or international meetings, or at major institutions or research organizations.

- Development/award of patents for discoveries in the candidate’s field.

**Outstanding**

- A substantial record of peer-reviewed first and/or senior authored publications that demonstrate evidence of originality as an investigator.

- A senior leadership role demonstrating superior competence and outstanding productivity on research projects.

- Consistent extramural support for an established research program.

- Service on National Advisory Councils or Boards, Editorship of journals, Leadership of national/international study sections, consensus panels, etc.

- Leadership of multi-institutional collaborative research projects.
peer-reviewed clinical trials as documented by program reviews or letters.

- Service on study sections (or scientific peer review groups), consensus panels, etc.

- Leadership of national meetings or workshops.

- Service on editorial boards of journals.

- A national and/or international reputation as evidenced by external letters of reference.
Appendix C
These items are examples and not intended to be all-inclusive.

Educational Scholarship

Educational Scholarship represents the synthesis of facts and theories in creative formats that facilitate their understanding and use by others, and the development of creative methodologies that foster such understanding.

Excellent

- College-level teaching awards from peers.
- Publication of teaching materials in peer-reviewed repositories or journals.
- Development of teaching materials or curricular approaches that are adopted by other institutions.
- Publication of research on education and learning assessment in peer-reviewed journals.
- Presentation of research on education and learning assessment at national/international meetings.
- Research on the efficacy of creative new teaching materials, courses, and curricula.
- Writing reviews on aspects of health sciences education.
- Writing reviews or textbooks on content areas in health sciences education.
- Competitive local funding of educational research and development programs.

Outstanding

- National/international teaching awards.
- National/international use of teaching materials.
- Widespread impact of instructional, curricular, or learning assessment approaches.
- Sustained, peer-reviewed program of research on education and learning assessment.
- Competitive external funding of research program on education and learning assessment.
- Leadership role in national/international health sciences education professional societies.
Appendix D
These items are examples and not intended to be all-inclusive.

**Clinical Scholarship**

Any activities relevant to the conceptualization, evaluation, improvement, or delivery of clinical care that are innovative, widely disseminated, and promote advancement in the field are considered Clinical Scholarship.

<table>
<thead>
<tr>
