This *Guide* and related information is on the Associate Provost’s website: [http://facultyaffairs.arizona.edu/](http://facultyaffairs.arizona.edu/)
You may also call the Provost’s Office at 626.0202.

The *University Handbook for Appointed Personnel (UHAP)* explains the policies for promotion. Tenure and nontenure-track faculty are covered by Chapter 3 in UHAP, while continuing-status professionals should consult Chapter 4A. Revisions of UHAP were approved by the Faculty Senate and will be on line on July 1.
From Hiring to Promotion

In your first year, you should schedule a meeting with your head or program director to discuss your workload assignment and the promotion criteria for your college and unit. Your head or director should provide you with a copy or a link to your unit’s and college’s criteria for promotion. Your workload assignment establishes the basic expectations that will be used to evaluate your achievements. You should use the questions that are included below to specify your job duties and explore how they line up with the criteria for promotion. For example, will you be teaching graduate courses and other courses that line up with your research interests? Should you teach a range of courses to prepare for promotion, or can you concentrate on several courses to improve your effectiveness and save time by reusing course materials?

You should use your meetings with your head and other senior faculty to discuss your duties and related resources, including any mentoring support that may be available. These meetings are crucial opportunities to clarify teaching, research, and service and outreach expectations. You should use these discussions to review your department’s experience with candidates going through promotion. In these discussions, you should realize that some questions about promotion cannot be answered with specifics. For example, no one will be able to specify how many articles are expected because quality is more important than quantity.

From your first year, you should seek out multiple perspectives. Do not be surprised if you sometimes get differing assessments. Many different viewpoints come into play in the process of reviewing dossiers. Dossiers are read by about twenty reviewers, including three to eight external reviewers, departmental and college committees, heads and deans, the University Committee, and senior administrators and the Provost, who makes the final decision on promotions. Your best sources of information will be recently promoted colleagues and senior colleagues who have recent experience reviewing Promotion Dossiers.

Annual Performance Reviews

At the end of your first year, and every year thereafter, you will prepare an annual report for the Annual Performance Review (APR). Your teaching, research, and service will be reviewed by a peer committee who makes a recommendation to your head, who then makes the final assessment. Your head should meet with you to discuss your work and your progress. Beyond these basic requirements, the procedures for APRs vary across departments. The annual review process will provide you with feedback on your progress toward promotion, and you will also be able to get feedback on the documentation that will be used in your Promotion Dossier. For example, you should prepare your curriculum vitae according to the format required for the dossier, and the report you write on your research, teaching, and service is a shorter version of the Candidate Statement that will be a key part of your dossier. You will use both documents to outline your program of work and characterize its significance.
In your discussions with your head and other senior faculty, here are some questions to clarify expectations and get feedback on your work.

Research:
- What do you look for in assessing the impact of research?
- Do the strands in my research program seem to be clearly defined and related?
- Do you have concerns about my research; for example, do you see that I have “independence” from senior collaborators?

Teaching:
- How is teaching effectiveness assessed in our department?
- Will I be able to teach a range of graduate and undergraduate courses?
- How can I align my course assignments with my research interests?
- Will I be able to teach some of the same courses from year to year?

Probationary or Retention Reviews

Retention Reviews are generally conducted in the third year. The scheduling may vary if you held a prior university position before coming here. The schedule of your Retention Review should be in your offer letter. The Retention Review serves as a dress rehearsal for your promotion review. You will use the same Dossier Template, and your CV and Candidate Statement should also be in the same format as the Promotion Dossier.

You should begin preparing for your retention review in your meeting on your prior annual review. You should follow up with a separate meeting to go over the parts of the Promotion Dossier. You should also attend the dossier workshops that are offered by the Associate Provost for Faculty Affairs each spring. If you begin preparing your dossier in the spring after your annual review, you will have time over the summer to get feedback on your Candidate Statement, teaching materials, and other parts of the Dossier before it is due in the fall.

The Retention Review follows some of the same steps as the promotion review. Most Retention Reviews conclude with a meeting with your head, though some departments also include the chair of the peer review committee. You should receive a written evaluation of any problems that are noted.

In some colleges, Retention Reviews are conducted at the department level, while in other colleges your dean and a college committee may also be part of the process. In a very few cases, a head may recommend that a candidate not be renewed. In such cases, the dossier must be forwarded from the department for college and university reviews. External reviews are not normally included but may be requested by the dean or Provost. The Provost may decide that a nonrenewal is appropriate when a candidate is not making timely progress toward promotion. In such cases, a candidate is given a terminal year appointment. The Provost may also decide to schedule another Retention Review in the fourth or fifth year. All steps in this process are detailed in the University Handbook for Appointed Personnel (UHAP).
Strategies for Using the Promotion Process to Achieve Your Career Goals

Getting promoted is a career milestone, and you should use the process to reflect upon how you can advance your program of work in strategic ways.

Use promotion criteria to develop an action plan. Department and college criteria play the major role in the promotion process because university criteria have to be general enough to address varied forms of research, scholarship, and creative achievements. Your colleagues have developed promotion criteria as a guide for assessing the quality and impact of work in your field. You should translate those criteria into benchmarks for assessing your annual progress and discussing your work with senior faculty.

Translating promotion criteria into annual goals can require some input from your colleagues. What sorts of publications and which journals are most highly valued? How important are conference presentations? What service and outreach roles are expected? These questions are easy to ask, though hard to answer. Talk through your publication plans with your colleagues to align your goals with promotion expectations.

Your annual reports provide an opportunity to reflect upon your goals and achievements, and then get feedback on how to characterize them. As with your Candidate Statement, your annual report should clarify your contributions. For example, if you have published coauthored articles with senior people, you will need to articulate your research agenda to help establish that you have an independent program of research and are not simply assisting with others’ research. If you are in a field where research funding is limited, your ability to articulate your research agenda and its impact may be even more important because you may have fewer benchmarks to demonstrate the quality of your research.

Solicit input from faculty in your department and discipline. If your work bridges disciplines or contributes to cutting-edge trends, you will need to talk with colleagues in your department and related fields about how to characterize your work in ways that value your contributions in terms that will make sense to reviewers. Talking about your work with your colleagues is vital to learning how to represent your work. The feedback you receive will help you assess how best to characterize your contributions in your annual reports and in the Candidate Statement that frames your Promotion Dossier.

Build a clearly defined profile of teaching, service, and research contributions. Through your discussions with colleagues and your own reflections, you will learn how to articulate how your teaching, research, and service and outreach contribute to your overall program of work. As you think about how to represent your wide-ranging projects as parts of a coherent program of work, you should also explore how to benchmark the impact of your varied contributions. To some extent, quality speaks for itself in teaching as in research, but quality can be harder to benchmark in teaching than in research. With your research, you can cite invited talks, publications, citations, and perhaps grants, but with teaching, about the only quantifiable benchmarks you have are Teacher Course Evaluations (TCEs). For this reason, we require peer reviews of teaching and instructional materials for all candidates. To help your colleagues understand your approach to teaching, you should articulate your teaching philosophy in the Promotion Dossier. Mentoring, advising, and even outreach may be integral to your teaching, but you will need to make those connections for reviewers. If you articulate how your research and teaching are related to your outreach and service, those efforts can play a more important part in promotion reviews. One way to establish such relationships is to characterize your service contributions as a form of leadership. Another way to characterize the impact of your service and outreach is to consider how your work advances the mission of your unit and the university. It can also be effective to cite related research, national trends, and best practices in your field of study.
**Promotion Policies**

**Yearly Promotion Review Schedule**

- **All dossiers are due to the Provost’s Office on January 15;** however, departments and colleges may deviate from the other dates suggested in this schedule.
- **When dossiers are forwarded from the department to the college, and then to the university committee, candidates must be notified of the recommendation that is being made.**

Requesting Delays in the Promotion Process

The University’s policy for delays on the tenure or continuing-status time clock was revised in the spring of 2012 to improve the support for assistant professors and continuing-status professionals. The following policies and procedures are being included in the full revision of the University Handbook for Appointed Professionals that will be available online on July 1, 2014.

The Provost has the sole authority to grant requests to extend the promotion clock for tenure-eligible faculty and continuing-status eligible professionals, based upon good cause shown for either personal reasons or other extenuating circumstances as set forth below. A faculty member should submit a written request for a promotion clock delay as early as possible, but no later than one year after the events or circumstances that form the basis for the request.

The University will not subject a faculty member who has been granted a promotion clock delay under this Section to additional scholarship or service requirements above and beyond those ordinarily required to qualify for retention or promotion. The Provost’s decision is not subject to further review.

1. Birth or Adoption
The Provost will approve timely requests for promotion clock delays based upon the birth or adoption of a faculty member’s child. Faculty members should submit such requests directly to the Office of the Provost. Faculty members may be asked to provide supporting documentation.

2. Personal Reasons
The Provost will consider timely requests for promotion clock delays based upon personal reasons that prevent a faculty member from meeting his or her research, teaching, or service obligations. Such personal reasons may include but are not limited to a faculty member’s own serious health condition or disability; the assumption of significant and ongoing care responsibilities as a result of the serious health condition or disability of a faculty member’s spouse, domestic partner, parent, or child; or the death of the faculty member’s child, spouse, or domestic partner.

Faculty members should submit such requests with supporting documentation directly to the Office of the Provost. If the request is based upon medical reasons, faculty members may choose to provide supporting medical documentation directly to the Disability Resource Center (DRC), rather than the Provost. Before making a determination on a request based upon medical reasons, the Provost will consult with the DRC.

3. Adverse Professional Circumstances
The Provost will consider timely requests for promotion clock delays based upon exceptionally adverse professional circumstances or impediments that are beyond a faculty member’s control and that prevent a faculty member from meeting his or her research, teaching, or service obligations. Faculty members should submit such requests directly to the faculty member’s director or head. Both the appropriate dean and the head or director must support the request, which the dean will then submit to the Provost for consideration.

4. Prestigious External Commitments
The Provost will consider timely requests for promotion clock delays based upon a faculty member’s prestigious external commitments that bring credit to the institution but which require inordinate time to perform, provided that the University has authorized such commitments. Faculty members should submit such requests directly to the faculty member’s director or head. Both the appropriate dean and the head or director must support the request, which the dean will then submit to the Provost for consideration.
Policies on Promotion Review Committees

Each college and department must have a standing committee on faculty status to advise the dean and department head before recommendations on promotion, tenure, and continuing status are forwarded.

- Promotion and tenure committees will include at least three tenured faculty, and continuing-status committees should include three academic professionals with continuing status.
- The committees shall be constituted so that recommendations by committees shall be made only by faculty or continuing-status professionals who have a rank superior to the candidate being considered, except in the case of review for promotion to full professor or full continuing status. In such cases, the committee members must be a full professor or a continuing-status professional with full status.
- In appointing departmental standing committees, please consider the candidate’s Affiliate Faculty status in Graduate Interdisciplinary Programs when relevant. In cases of significant participation in a GIDP, a GIDP faculty of appropriate rank should be appointed to the standing committee.
- Committee members or administrators who have coauthored substantial publications or grants with a candidate should recuse themselves to avoid raising questions about the independence of reviews. If recusing committee members is not feasible, for example because of the size of the department, the committee must address the concerns about conflicts of interest in its letter.
- Individuals who serve concurrently on departmental, college and/or University promotion and tenure committees must recuse themselves from voting on any case they have voted on in a prior committee.
- The judgment of review committees is to be independent of the judgment of the administrators to whom they report. Standing committees normally will meet without the administrator whom they advise, as noted in UHAP.

The Role of Peer-Review Committees

As required in UHAP, review committees should begin their deliberations by reviewing department and college promotion criteria for research, teaching, and service and outreach. Committees should also review these standards at the conclusion of the process and suggest needed revisions to the appropriate administrators. As part of their responsibilities, department heads are required by UHAP to advise candidates in writing of their recommendations regarding renewal, nonrenewal, promotion, or tenure or continuing status at the time the recommendations are forwarded to the next level in the review process.

The Provost will appoint University Promotion Committees to review Promotion Dossiers for faculty and Promotion Dossiers for continuing status following the appropriate UHAP. These committees will advise the Provost in all tenure and continuing-status considerations. In accordance with University-level criteria, these committees will carefully and systematically review all pertinent materials provided by departments and colleges to ensure that high standards of accomplishment and professional performance are maintained.

Additions to Dossiers

On rare occasions information on a candidate’s work becomes available during the review process. For example, a candidate may receive an award, grant or publication. Such information may be added using these procedures:

- An administrator or committee chair must recommend that the information be added to the dossier.
- The candidate must be informed that the materials will be added.
- The expanded dossier must be re-reviewed by all levels of reviewers.
- If the additional materials consist of factual information that might be deleterious to the candidate’s case, the candidate must be given the opportunity to add a response to the dossier.
- A request to amend the dossier must be received by the Office of the Provost by February 1st, unless the request comes from the University P&T or continuing-status committee.
Notification of Candidates on Promotion Recommendations

As required by UHAP, heads and deans will inform candidates in writing of recommendations on renewals, promotions, tenure, or continuing status when recommendations are forwarded to the next level for review.

Appeals of Promotion Decisions

The Provost decides whether an individual will be renewed, promoted, or granted tenure or continuing status. Upon receiving the notice that they will not be promoted and/or nonrenewed, candidates may request to be informed on the reasons for the decision. In the case of the nonrenewal of a tenure-eligible or continuing-status-eligible individual up for review in his/her mandatory year, a terminal contract will be offered for the next appointment period.

Candidates may choose to appeal the outcome of their retention, mandatory, or promotion review by writing a letter to the President within thirty days of the notice of the Provost’s decision. The President’s decision is issued in writing and forwarded to the faculty member involved, along with copies to the Provost and the appropriate dean and department head within ninety days of the notice of appeal. The Committee on Academic Freedom and Tenure may consider allegations of unlawful discrimination or other unconstitutional actions such as the violation of due process and recommend that additional review or action be taken.
Preparing Dossiers

Recent Revisions to Promotion Dossiers

On April 1, 2013 the Faculty Senate approved the following revision of our University P&T criteria:

Promotion and tenure require excellent performance and the promise of continued excellence in 1) teaching, 2) service, and 3) research, creative work, and scholarship. The University values an inclusive view of scholarship in the recognition that knowledge is acquired and advanced through discovery, integration, application, and teaching. Given this perspective, promotion and tenure reviews, as detailed in the criteria of individual departments and colleges, will recognize original research contributions in peer-reviewed publications as well as integrative and applied forms of scholarship that involve cross-cutting collaborations with business and community partners, including translational research, commercialization activities, and patents.

Parallel revisions were also made to our criteria for promotion and continuing status:

Continuing status requires excellent performance and the promise of continued excellence in the candidate’s assigned duties, which may include teaching, outreach, service, and research, creative work, and scholarship. The University values an inclusive view of scholarship in the recognition that knowledge is acquired and advanced through discovery, integration, application, and teaching. Given this perspective, continuing status and promotion reviews, as detailed in the criteria of individual units, departments, and colleges, will recognize a wide range of original research-based contributions in peer-reviewed publications as well as integrative and applied forms of scholarship that involve cross-cutting collaborations with business and community partners, including translational research, commercialization activities, and patents.

Resources on this “inclusive view of scholarship” are available on line:
http://facultyaffairs.arizona.edu/content/promoting-inclusive-view-scholarship

To support this initiative, teaching portfolios are now required in dossiers. A Teaching Portfolio is a collection of selected instructional materials to support the discussion of teaching in the Candidate Statement. Candidates may also want to refer to related research to show how the teaching is informed by best practices in the field. Candidates should include a selection of instructional materials from a range of classes to document instructional innovations, curricular designs, and outcomes assessments. A full list of possible materials is included in the Promotion Dossier Template. Candidates should consult with their head or the chair of their review committee on formats. Questions can also be directed to Kat Francisco in the Provost’s Office: ksexton@email.arizona.edu

• The Teaching Portfolio from the University Center for the Advancement of Teaching at Ohio State University is a good introductory page that provides an accessible overview of the basics.

• The Teaching Portfolio by Hanna Rodriguez-Farrar provides an overview of the basics of a teaching portfolio and step-by-step advice on how to create one.

• Brown University’s Sheridan Center provides a survey of varied materials on teaching portfolios.

Department committees are required to review this Portfolio and do an observation of candidates’ teaching. Peer reviews of teaching are being required so that assessments of teaching are not based solely on surveys of students such as Teacher-Course Evaluations (TCEs). Candidates should use their candidate statement and portfolio to prepare reviewers to observe their teaching. Reviewers and candidates who are being reviewed can both find advice on the Peer Review of Teaching Protocol webpage developed by Dr. Ingrid Novodvorsky in the Office of Instruction and Assessment.

A Service and Outreach Portfolio and a template letter to community collaborators have been added as options to Dossiers. The Service Portfolio can be used to document candidates’ collaborations with business and community partners, including underserved groups, resources for state agencies, and work on commercialization activities and tech transfer. This Service and Outreach portfolio can also be used to document administrative service. To provide additional documentation on the impact of service and outreach contributions, supporting letters can also be solicited using the template for Professional, Client and Community partners.
Advice on Candidate Statements

The Candidate Statement is where you can detail your research program and relate it to your teaching and service. In addition to providing an overview of the progress and impact of your research, the Candidate Statement provides an opportunity for you to set out the principles that guide the teaching and service contributions that are detailed in your Teaching Portfolio and your Service and Outreach Portfolio. While your Candidate Statement will be read by all your internal and external reviewers, your syllabi, assignments, and service materials will only be available for departmental reviews.

How can you use your Candidate Statement to help reviewers understand your work?

- How can you highlight your achievements in ways that relate them to promotion expectations, especially your departmental and college criteria?
- How can you relate your research, teaching, and service to the duties in your workload assignment?
- How can you provide a sense of why you are excited about your work, and how it is important?

How can you inform specialist reviewers, and also convey the importance of your work to non-specialists?

- Given that your external reviewers will establish the baseline assessments of your research, how can you set out a program of research that will be seen as advancing important trends in your discipline?
  - What are the problems, terms, and concepts that will be of most interest to expert readers?
  - How can you help less specialized readers by providing definitions and examples?
  - Can you benchmark the importance of your research, perhaps by noting invitations to present your work, the standing of the journals you publish in, or citations of your publications?
- How can you benchmark the progress and impact of your program of research?
  - How has your research advanced since your dissertation?
  - If you work on research teams or have collaborated with your dissertation director, how can you demonstrate your independent contributions to those collaborations?
  - Where is your research headed? What will its impact be, and how will you achieve it?

How can you relate your research to your teaching and service to show the broader impact of your work?

- Has your research improved your teaching? For example, have you worked with more graduate students, residents, and/or fellows or helped them in new ways? Have you helped to revise courses or curricula?
- How does your work contribute to the missions of your department and the university, for example, through the creation of internships, research opportunities, or partnerships?
- What is the broader social and economic impact of your program of work?

In addition to discussing your basic research contributions, you may wish to draw on the university’s “inclusive view of scholarship” to discuss how your work has “advanced through discovery, integration, application, and teaching.” This viewpoint recognizes “original research contributions in peer-reviewed publications as well as integrative and applied forms of scholarship that involve cross-cutting collaborations with business and community partners, including translational research, commercialization activities, and patents.”

Remember your readers will include non-specialists as well as experts. Your external reviewers may skim your CV and then look to your Candidate Statement to help them assess the development and significance of your research. Your research is detailed in your publications, so focus on major findings and refer to your publications for specifics. Remember that most of your internal reviewers will not be specialists in your field. They will generally be more broadly concerned with how your work matters. They may also be interested in how your research has contributed to your teaching and to broader social, economic, and educational trends. To be effective with such readers, you should avoid overloading sentences with complex terminology. Use your Candidate Statement to discuss the overall program of work that is detailed in your CV.
ADVANCE Resources on Mentoring and Promotion

The following resources have been developed by the ADVANCE program, which is committed to advancing “the research and scientific reputation of the University of Arizona by promoting faculty diversity and the equitable treatment of faculty.” The UA ADVANCE program is managed by the Center for Research, Equity and Opportunity (CREO) with funding awarded by the National Science Foundation's ADVANCE IT program.

Directions on Dossiers

UA tenure and continuing-status committees evaluate about one hundred dossiers each year. Every dossier is read by up to twenty reviewers, including external reviewers, departmental and college committees, and heads and deans. To avoid time-consuming problems, Promotion Dossiers must follow the Dossier Template and established procedures. Dossiers are returned to departments when required formats and procedures are not followed. As noted above, most problems arise from using evaluative or ill-defined workloads and enlisting collaborators to serve as reviewers.

In addition to following established procedures, candidates are responsible to submit materials in a timely manner in specified formats. If a dean or college committee determines that a dossier is missing essential elements, the evaluation process should be halted until materials are secured. In some circumstances, a dean may choose to re-initiate the department-level review. Likewise, if the University Advisory Committee finds that reviews have been affected by a poor dossier, the committee may request that materials be revised or added. This action re-initiates the review at the departmental level.

The Dossier Template provides checklists of requirements to divide the sections of Promotion Dossiers. The checklists note the items to be reviewed in each section, and thereby help to ensure consistency and completeness in dossiers. The checklists also help to save time in each level of the review process.

Section 1: Summary Data Sheet
Promotion Dossiers are used for a wide range of reviews. This sheet helps to ensure that reviews follow the appropriate procedures. For example, with candidates at the assistant rank, committees cannot divide the decisions on promotion and tenure.

Section 2: Summary of Candidate's Workload Assignment
This one-page form is filled out by heads to provide specifics on assigned duties. It should not evaluate contributions. It should specify what a figure such as “40% teaching” generally entails in the candidate’s unit.

If the candidate’s duties have changed over the time in rank, the changes should be specified. If there was a time clock delay (TCD) in the promotion process, indicate it with TCD in the appropriate Academic Year’s column, in the row labeled Other. To preserve candidates’ privacy rights, the dossier should not state reasons for delays. Simply specify the dates, for example by noting “Approved TCD 2009-10.”

Workload assignments should note shared appointments. Shared appointments are defined as those where candidates’ budget lines are split between two or more units. The Promotion Dossiers for split appointments should include the Checklist for Shared Appointments (Appendix A). This form helps to ensure that the heads of the units and the individuals all agree upon the terms of the appointment, including the teaching load, service expectations, and the constitution of the peer-review committee.
Section 3: Departmental and College Promotion and Tenure Guidelines

Include one-page summary following Appendix B format.

Section 4: Curriculum Vitae and List of Collaborators

The List of Collaborators should include all individuals who have collaborated with the candidate within the sixty months preceding the submission of the dossier. Such collaborations include coauthoring books, articles, abstracts, papers, or grant proposals or co-editing journals, compendia, or conference proceedings. If the candidate has not collaborated with anyone in the last five years, simply note that fact in the List.

- Publications should be listed in chronological order.
- Place an * to left of title of any publication substantially based on work done as a graduate student.
- Page numbers and all other publication data should be included.
- For foreign publications, provide English translations of titles.
- Scholarly presentations should be distinguished from proceedings and other publications.
- Distinguish invited from submitted presentations.
- List only pending or funded grants during the period in rank.
- Grants should be organized according to source of funding (federal, industry, foundations).
- Check list of collaborators to ensure it is accurate.

Section 5: Candidate Statement

Candidate Statements vary among disciplines. Some reviewers will read the statement to assess the candidate’s research program, while others will also be interested in how candidate’s teaching, and service connect with their research. Candidates should speak with their heads and committee chairs on such points.

Section 6: Teaching Portfolio

Candidates are responsible to provide information and supporting documentation on their teaching and advising. Syllabi, assignments, and other supporting documentation are for reviews by departmental committee and head. These instructional materials will not be forwarded for college or university reviews.

Section 7: Evaluation of Teaching and Advising

Departmental committees are required to write a memo that includes their observation of the candidate’s teaching and their assessment of the candidate’s instructional materials. Committees may wish to use the Peer Review of Teaching Protocol developed by Dr. Ingrid Novodvorsky, who is prepared to consult with candidates and committees on peer reviews (novod@email.arizona.edu). The memo should also review the candidate’s Teacher-Course Evaluations or other student assessments with comparison groups.

Section 8: Service and Outreach Portfolio (Optional for P&T Reviews, New 2013)

This section is an option for P&T candidates whose outreach and service are integral to their programs of work. This section is a revision of the Continuing Status Dossier section Outreach Educational Programs. The Service and Outreach Portfolio serves to provide supporting documentation for the Candidate Statement. This documentation is for departmental reviews and will not generally be forwarded to college committees.

- Candidates should consult our resource page on the scholarship of engagement: http://facultyaffairs.arizona.edu/content/promoting-inclusive-view-scholarship
- Reviewers should consult these Evaluation Criteria for the Scholarship of Engagement: http://schoe.coe.uga.edu/evaluation/evaluation_criteria.html

Section 9: Documentation for Interdisciplinary Candidates

Reviews of candidates who are members of Graduate Interdisciplinary Programs should follow the Guidelines of Acknowledgment and Evaluation of Faculty Participation in GIDPS (Appendix C). Candidates may also choose to discuss their GIDP participation in their Candidate Statement.
Section 10: **Letters from Outside Evaluators**

Dossiers are required to include three to eight signed letters from similar academic departments outside the University of Arizona. All letters must be from independent, outside evaluators who are not collaborators of the candidate. As indicated above, collaborators are defined as individuals who have coauthored books, articles, abstracts, or grant proposals or co-edited journals, compendia, or conference proceedings within the five years before the submission of a dossier. Collaborators also include individuals who have been a candidate’s dissertation advisor, supervisor, or close coworker in a lab, department, or residency program, even if this relationship occurred more than five years prior to the review. To ensure the independence of outside reviews, candidate may not influence or attempt to influence the assessments of outside evaluators.

For this and other reasons, communications with external reviewers should be fully documented. A sample letter to external reviewers is included as Appendix D. **Heads should deviate from the exact wording of the sample letter only with the permission of their dean, and substantive changes must be approved by the Office of the Provost.** The candidate should suggest possible evaluators to the department head, but no more than half of the evaluators can come from the candidate. If the candidate suggests the same reviewer as the head or committee, the reviewer should be counted as being from the candidate.

The criteria for selecting external reviewers should not discourage collaboration, as former President Sander stressed in a 2011 memo to campus:

> As a university, we value and are recognized nationally for our collaboration among colleagues, both externally and internally. The important aspect of citizenship is embedded within our research and creative activity, as well as across our teaching and community engagement/service endeavors. We are writing to reconfirm that these activities continue to be appropriate considerations as part of the broad range of contributions reviewed in our process for promotion, tenure and continuing status.

Section 11: **Recommendations for Promotion**

Administrators and committee members should not have collaborated with the candidate in a **substantial** and **ongoing** way. In such occurrences, they should recuse themselves and, in the case of a department head, appoint a surrogate head. If recusing committee members is not feasible, for example because of the size of the department, the committee letters must address the concerns about the independence of the collaborators. If these concerns are not addressed, dossiers may be returned to departments to provide committees with the opportunity to do so. If the candidate is active in a GIDP, an evaluation from the GIDP Chair should be included in Section 8. The positive and negative comments of the outside reviewers should be fairly and fully represented in the letters of the departmental committee and/or department head.

**Revisions to Template Letters in Appendices**

**Appendix D: Sample Letter to Outside Evaluators**

The revised university promotion criteria have been added to the template letter for external reviewers.

**Appendix E: Sample Letters to Research Collaborators and Professional, Community, or Client Collaborators**

An optional template has been provided for requesting letters from research and community collaborators and clients. Letters from research collaborators can be useful if candidates have engaged in extensive collaborations with senior faculty. In such cases, collaborators can speak to the independent contributions of the candidate. Collaborator letters from community partners or clients serve a different purpose. Such letters can be useful in assessing the extent, impact, and significance of candidates’ collaborations with business, community, and agency partners. Such letters should be requested by heads, directors, or review committee chairs, but candidates may also make such requests using the recommended template. The template is intended to help nonacademic partners understand the points at issue in promotion reviews.
Checklist for Departments and Colleges

Four problems result in most of the returns of dossiers to departments. All dossiers should be reviewed to check on these problems to avoid delays arising from having to re-review incorrectly prepared dossiers. When procedures are not followed, dossiers have to be returned to departments to repeat the reviews at each level in the process.

1. **Does the Workload Assignment describe the candidate’s duties in non-evaluative terms that provide adequate details on the candidate’s teaching load and any split appointments?** As the first document in the dossier, the Workload Assignment provides the baseline for reviewers to make independent assessments of candidates’ achievements, so the workload description should not praise the candidate’s contributions. While a position description should not use evaluative terms, it should provide enough detail to clarify how many courses are expected and what duties are included in the appointment.

2. **Were no more than half of the external reviewers suggested by the candidate, and did the process follow the prescribed procedures, including the required template?** No more than half of the reviewers can come from the candidate’s suggestions. Each step in the process should be documented using the checklist in the Dossier Template. Any changes in the letter to reviewers must be approved by the Provost’s Office.

3. **Were any coauthors and collaborators of candidates included as external reviewers, committee members, or administrative reviewers?** The University looks to external reviewers to provide an independent assessment of a candidate, and their impartiality is called into question when they have collaborated with a candidate. Collaborators should not serve as external or internal reviewers. Questions about the independence of reviewers can lead to dossiers being sent back to be re-reviewed by departments and colleges.

As with the provisions used by NSF and other groups to ensure the impartiality of reviews, collaborators are defined as individuals who have coauthored books, articles, abstracts, or grant proposals or co-edited journals, volumes, or conference proceedings within the last five years. Collaborators also include individuals who have been a candidate’s dissertation advisor, supervisor, or close coworker in a lab, department, or residency program, even if this occurred more than five years prior to the review.

Committee members or administrators who have coauthored substantial publications or grants with a candidate should recuse themselves to avoid raising concerns about their impartiality. If collaborators serve on review committees or in administrative roles, they may provide a separate letter that describes the independent contributions of the candidate. If recusal is not feasible, for example because of the size of a department, concerns about conflicts of interest must be addressed in the letter reviewing the candidate. Questions about this matter should be directed to the Associate Provost for Faculty Affairs.

4. **Is a separate teaching review provided by the department committee?** This memo should be included in section seven of the dossier. Detailed assessments of candidates’ teaching are particularly essential with unusual teaching assignment such as team-taught classes or residencies. If Teacher-Course Evaluations are not available, student assessments should be provided along with benchmarks for comparative assessments. Summaries of students’ individual comments should be prepared by committees to ensure the comments are representative. Dossiers that do not have reviews of teaching Section Seven should be returned by college offices to departments to avoid creating subsequent delays when the dossiers are returned to complete the required review of teaching.
