Academic Freedom

Learning requires concentrated attention and happens best in environments where a wide range of perspectives are welcome and encouraged. Allowing space for opposing views is central to academic inquiry, and that responsibility rests with all of us. Academic freedom, which is essential to the advancement of knowledge, is rooted in and regulated by the norms of the disciplinary communities within which the faculty are credentialed. In research, this means we are free to pursue areas of inquiry, wherever they may lead. In education, it means the freedom to teach from our disciplines, and the freedom of our students to engage within the parameters of the discipline openly and fully. Academic freedom also allows us to comment on University or unit governance without fear of retribution. ARS §15-1601(B) and our Guidelines for Shared Governance: Memorandum of Understanding entered into by the Faculty and the Administration of the University of Arizona describe the statutory and mutually agreed upon role of faculty in the governance of the University.

As faculty and academic professionals, we bear special responsibilities to contribute to informed deliberations on academic issues. Our primary responsibility to our academic discipline and to our society is to seek and state the truth based on available evidence. Guided by recognition of the value of evidence-based inquiry to our community and an informed citizenry, we recognize our shared obligation to exercise critical judgment and self-discipline in using, extending, and transmitting knowledge. To this end, we devote our energies to developing and improving critical thinking and scholarly rigor through teaching, research, and engagement with the University’s broader constituencies.

The University values an inclusive view of scholarship in the recognition that knowledge is acquired and advanced through discovery, integration, application, and teaching.

The University **values collaboration** among colleagues, both externally and internally, and the candidate's contributions to such collaborations will be considered in promotion reviews.

Depending on the assigned duties of individual candidates and the criteria of their departments and colleges, promotion reviews may consider **original research contributions in peer-reviewed publications** as well as **integrative and applied forms of scholarship that involve cross-cutting collaborations with business and community partners, including translational research, commercialization activities, and patents.**
Inclusive Scholarship Policy was driven by some of the following factors:

- Increasing speeds of technology
- Large data science and collaborative science
- New demands for scholarly transparency and accountability in midst of hyper-competitiveness and haste to reach positive outcomes and funding
- Public scrutiny of relevance of scholarship
- Widespread calls for scholarship of relevance to diverse communities

- University of Arizona Values
- Land Grant Mission to serve local students – and extend knowledge from campus to local region
- Hispanic Serving Institution Designation and dedication to excellence in serving students of all backgrounds

Ernest Boyer’s *Scholarship Reconsidered*

The scholarship of discovery includes investigations inquiries that generate new knowledge.

The scholarship of integration makes interdisciplinary connections to synthesize knowledge in new ways.

The scholarship of application is concerned with applying knowledge to social issues, sometimes to test theories and ground knowledge making.

The scholarship of teaching includes transforming and extending as well as transmitting knowledge.

The scholarship of engagement extends these forms of inquiry by collaborative inquiries on social issues.

Based on *The Scholarship of Engagement*,
Center for Experiential Learning, Loyola University
Publicly Engaged Scholarship

- **Type 1. Research—business, industry, commodity group funded.** Sponsored research or inquiry supported through grants or contracts from businesses, industries, trade associations, or commodity groups (e.g., agricultural or natural resources groups) that generates new knowledge to address practical problems experienced by public or practitioner audiences.

- **Type 2. Research—nonprofit, foundation, government funded.** Sponsored research or inquiry supported through grants or contracts from community-based organizations, nonprofit organizations, foundations, or government agencies that generates new knowledge to address practical problems experienced by public or practitioner audiences.

- **Type 3. Research—unfunded or intramurally funded applied research.** Community-responsive or community-based research or inquiry that is not funded by a community partner but instead is pursued by faculty through intramural support or as financially unsupported research or inquiry.

- **Type 4. Creative activities.** Original creations of literary, fine, performing, or applied arts and other expressions or activities of creative disciplines or fields that are made available to or generated in collaboration with a public (non-university) audience.
Publicly Engaged Instruction

  - Classes and instructional programs that offer student academic credit hours and are designed and marketed specifically to serve those who are neither traditional campus degree seekers nor campus staff.

• **Type 6. Instruction—for credit—curricular, community-engaged learning.**
  - Classes and curricular programs where students learn with, through and from community partners, in a community context, under the guidance and supervision of faculty members.

• **Type 7. Instruction—noncredit—classes and programs.**
  - Classes and instructional programs marketed specifically to those who are neither degree seekers nor campus staff.

• **Type 8. Instruction—noncredit—managed learning environments.**

• **Type 9. Instruction—noncredit—public understanding, events, and media.**
  - Scholarly resources designed for the general public that are accessible through print, radio, television, or web media. General examples include self-paced educational materials and products (e.g., bulletins, pamphlets, encyclopedia entries, educational broadcasting, CD-ROMs, software, textbooks for lay audiences); dissemination of scholarship through media (e.g., speakers’ bureaus, TV appearances, newspaper interviews, radio broadcasts, web pages, and podcasts, if scholarly and readily available to the public); and popular writing in newsletters, popular press, or practitioner-oriented publications.
Publicly Engaged Service

- **Type 10. Service—technical assistance, expert testimony, and legal advice.** Provision of university-based knowledge or other scholarly advice through direct interaction with non-university clients who have requested assistance to address an issue or solve a problem.

- **Type 11. Service—co-curricular service-learning.** Service-learning experiences that are not offered in conjunction with a credit-bearing course or academic program and do not include reflection on community practice or connections between content and the experience.

- **Type 12. Service—patient, clinical, and diagnostic services.** Services offered to human and animal clients, with care provided by university faculty members or professional or graduate students, through hospitals, laboratories, and clinics.

- **Type 13. Service—advisory boards and other discipline-related service.** Contributions of scholarly expertise made by faculty, staff, and students at the request of non-university audiences on an ad hoc or ongoing basis.

What Do SCSs/TCEs Measure?

- Student experiences, perceptions, feelings, self-reflections on their effort and learning, self-assessment on performance and expected grade, self-efficacy, etc.
- SCSs/TCEs can measure students’ perceptions of instructor and course effectiveness in support of their program completion and perceived learning.

Limitations of SCS and TCE

- Student learning and grades.
- Research has found that the gender, ethnicity and sexual orientation of faculty have been associated with student evaluations.
- Student open-ended comments are summarized by departmental committee and not forwarded beyond the department.

Section 9A: Peer Observation of Teaching for Promotion and Tenure Review

In Person Teaching

Peer Observation of Teaching is coordinated by the candidate's Department Head/Director. They will identify an observer of the appropriate rank and title and request and observation in the Spring or Fall semester of the submission of the packet. The Department Head will pass on relevant information and class materials to the observer. The observer will use this template to complete their review and submit it to the Department Head/Director by the date set in order to include it in the review by the Departmental Review Committee. Similar to the Student Course Survey, this form includes review criteria in four key areas: Instruction, Assessment, Learning, and Student Instructor Interactions. These items are based on best practices for promoting student learning. We recommend that reviewers cite specific evidence for all of the criteria. If you have any questions about the peer observation of teaching, please contact Dr. Lisa Elfring with UCATT at elfring@arizona.edu.
